

Transportation to and from school

The district does not provide transportation to and from school for any student, whether the student lives inside or outside the town limits.

Upon request, the district will provide compensation for mileage at the districts current rate of reimbursement for mileage for those families that live more than 2 miles beyond the town limits.

If the IEP of a Special Education student requires a student attend a center based program in Durango or another surrounding community, the District shall waive all transportation fees for transportation of the Special Education student and shall provide transportation to the center based program in accordance with the IEP.

LEGAL REF.: 1 CCR [301-26](#), 4204-R-17.10 (*district must make effort to minimize student ride times while considering multiple factors; Board may establish maximum ride times*)

NOTE: An accompanying regulation may be needed to establish how walking distances will be measured. Because student transportation is a sensitive area, Board approval of the regulation may be advisable.
